

## Creative double tip: Goldfaber Aqua Dual Marker

Fine or flat drawing, dry or wet? The good news for passionate beginners and hobby artists: the new Goldfaber Aqua Dual Marker makes everything possible. Faber-Castell presents its first creative marker with two tips in the Creative Studio range, allowing a wide range of techniques.

While the thin, metal-cased fineliner tip with a line width of 0.6 mm is suitable for details, contours, fine lines and lettering, the thick brush tip is ideal for flat painting and drawing. Whether classic applications or trendy themes, the Goldfaber Aqua Dual Marker is the perfect tool for lettering, for comic and mandala artists, for sketching, illustrating and colouring.

For this purpose, there is an extensive and fascinating range of 60 bright colours to choose from. The highlight: The ink of the Goldfaber Aqua Dual Marker is water-based and therefore watercolourable. This is particularly interesting for all lettering fans who work with blends to conjure up great colour gradients on paper and really set the scene for their artwork.

The creative markers are available individually as well as in four basic and eight theme sets. These are equipped with six pens each of the colour worlds Fantasy, Tuscany, Flowers, Candy Shop, Shades of Grey, Portrait, Lettering and Graffiti.

With the Goldfaber Aqua Dual Marker, Faber-Castell is taking another step towards an even more sustainable range: the barrels and caps of the creative markers are made of 100% recycled plastic and are developed and produced in the company's own facilities in Germany. The packaging is made from environmentally friendly cardboard made from recycled paper.
