Naturally beautiful: AMBITION Precious Resin Sand

Autumn is drawing near and with it the season of soft, earthy colours. The new AMBITION made of precious resin blends harmoniously into this time of year, it is pure and simple: the range of writing instruments presents itself in the timeless colour sand which exudes both warmth and elegance.

The new model from the AMBITION collection features the familiar slim barrel made of matt precious resin as well as front and end pieces made of chrome-plated metal. The ballpoint pen has a twist mechanism to extend and retract the black magnum refill in line width B. The fountain pen, too, ensures perfect ease of writing with its high-grade stainless steel spring and cap that fits either end. The spring-loaded metal clip secures the pen safely to an agenda or diary even when out and about.
